

事件基础

```

var EventUtil = {
  addHandler : function ( element , type , handler ){
    //省略的代码
  },
  getEvent : function ( event ) {
    return event ? event : window.event ;
  },
  getTarget : function ( event ) {
    return event.target || event.srcElement ;
  },
  preventDefault : function ( event ) {
    return event.preventDefault() ? event.preventDefault() : event.returnValue = false ;
  },
  removeHandler : function ( element , type , handler ) {
    //省略的代码
  },
  stopPropagation : function ( event ){
    return event.stopPropagation() ? event.stopPropagation() : event.cancelBubble = true ;
  } ;
} ;

```
